

UMESHA GODAWELA

Associate Flutter Developer | IT Undergraduate (Final Year: Expected 2026 Aug)

+94 70 744 5924 | umeshagodawela@gmail.com | LinkedIn: umesha-godawela | GitHub: Godawela | Medium Articles

PROFESSIONAL SUMMARY

Versatile IT undergraduate at University of Moratuwa with two completed internships specializing in Flutter mobile development and full-stack web engineering. Skilled in building production-level cross-platform mobile apps with Flutter & Dart and modern front-end interfaces with React JS and Tailwind CSS. Experienced across the full software development lifecycle, from UI design in Figma through to API integration and deployment with a strong foundation in agile workflows, version control, and clean component architecture.

WORK EXPERIENCE

Flutter Mobile App Developer Intern | Nimbus Venture (Pvt) Ltd.

Feb 2025 – Aug 2025 (6 months)

Nawala, Sri Lanka · Hybrid

- Built and maintained production-level cross-platform mobile app features using Flutter & Dart, delivering polished UI screens and functional modules within sprint cycles.
- Integrated RESTful APIs into the mobile front-end, handling data fetching, state management, and error handling across multiple screens.
- Collaborated with back-end engineers, designers, and QA in daily stand-ups, sprint planning, and code reviews.
- Applied Git-based version control workflows — managing feature branches, pull requests, and merge conflicts in a shared codebase.

Software Engineer Intern | Zincat Technologies

Dec 2024 – Aug 2025 (9 months)

Sri Lanka

- Contributed to full-stack development tasks, building and refining front-end components and back-end features within a professional engineering team.
- Worked within an agile environment, meeting sprint deadlines and collaborating effectively across team roles.
- Gained exposure to production codebases, software architecture patterns, and industry-standard engineering practices.

KEY PROJECTS

Internal Company Management System | React JS, Spring Boot, MongoDB

- Architected and built a full-stack company management system with an admin dashboard, event calendar, and automated event reminder module.
- Built reusable React components applying state management and component lifecycle best practices; designed and consumed RESTful API endpoints for efficient client-server data flow.

Medical Device Instruction & Symptom Detection App | Flutter, Node JS, MongoDB

- Engineered a hospital-facing Android app using Flutter with a parent-child widget architecture for step-by-step guided device usage flows.
- Integrated a Node JS REST API and MongoDB database for symptom-based illness identification; applied UX best practices for non-technical medical staff.

Library Management System | React, Spring Boot, MongoDB | ReadSphere

- Built a role-based library management system for library managers and end users.

Student-Friendly Smart Study Table | C, Arduino IDE, Proteus Simulation

- Developed embedded C firmware for an Arduino Uno IoT device with ultrasonic, LDR, and DHT11 sensors for user detection, study-time tracking, and health alerts.

Video-Based Canine Behavioral Representation Learning

- This research focuses on developing a video-based framework for extracting and quantifying canine behavioral patterns associated with rabies-related symptoms.

- The study investigates the use of computer vision techniques to analyze dog motion and posture dynamics from unconstrained video data.
- Behavioral indicators such as motion erraticity, posture instability, head tremor, circling behavior, and spatial jitter are being modeled as continuous quantitative descriptors.
- Signal processing and motion analysis techniques are being applied to capture temporal behavioral variations from raw video sequences.
- The system aims to construct a structured behavioral feature representation that can be utilized for downstream behavioral inference and decision-making tasks.

TECHNICAL SKILLS

Mobile & Frontend (Primary Focus)	Backend & Databases	Tools & Practices	IoT & Embedded
Flutter & Dart (Prod.)	Node JS	Git & GitHub	Arduino IDE
React JS	Spring Boot (Java)	Agile / Scrum	Atmel Studio (Atmega32)
React Native	MongoDB	Jira, Asana, Redmine	C (Embedded)
HTML5, CSS3, Tailwind CSS	MySQL	Postman, Swagger	Proteus Simulation
JavaScript (ES6+)	Firebase	VS Code	
Figma (UI/UX Design)		Android Studio	

EDUCATION

BSc (Hons) in Information Technology and Management 2022 – Present (Expected: Aug 2026)
University of Moratuwa | Faculty of Information Technology · Moratuwa CGPA: 3.42

G.C.E Advanced Level 2020
Hillwood College, Kandy Results: 3B · Z-Score: 1.7099

CERTIFICATIONS

- React (Basic), SQL, Problem Solving – HackerRank
- Front-End Web Development – CODL, Univ. of Moratuwa
- API Development & Postman – Fidenz Academy / Postman
- Basics of Python – CODL / Code Studio
- BA Foundation, Git from Scratch – LinkedIn Learning
- Introduction to Data & Data Science – 365 Data Science
- Java (Intro & Intermediate), HTML, CSS, C – SoloLearn
- MongoDB Tutorial, DBMS, Computer Vision – Great Learning

COMPETITIONS & ACHIEVEMENTS

14+ inter-university competition participations including:

- IDEALIZE 23 & 24 – Mobile App & Web Dev
- HackX 9.0 – Web Development
- HackElite 1.0 – Hackathon
- CodeRally 5.0 – 24-Hour Hackathon
- MoraXtreme 9.0 – 12-Hour Hackathon
- ALGOXPLORE 1.0 – 12-Hour Hackathon
- Tech-Triathlon by RootCode 22 & 24 – Hackathon
- Devthon 1.0 – Web Development
- HackMoral – Mini Hackathon
- Mora UXplore 2.0 – UI/UX Competition
- Aurora 2024 – UI/UX Competition
- LadyProto 1.0 – UI/UX Competition

REFEREE

Ms. M.N. Chandimali — Lecturer, Dept. of Information Technology, Faculty of IT, University of Moratuwa | nipunic@uom.lk

Mr. Thushan Isuru — Senior Software Engineer, AirAsia | isuru072@gmail.com
